1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☒ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/EP2005/050037

Box No. I Basis of the opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
 - ☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material:
 - ☐ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material:
 - ☐ in written format
 - ☐ in computer readable form
 - c. time of filing/furnishing:
 - ☐ contained in the international application as filed.
 - ☐ filed together with the international application in computer readable form.
 - ☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

Box No. II Priority

1. ☒ The validity of the priority claim has not been considered because the International Searching Authority does not have in its possession a copy of the earlier application whose priority has been claimed or, where required, a translation of that earlier application. This opinion has nevertheless been established on the assumption that the relevant date (Rules 43*bis*.1 and 64.1) is the claimed priority date.
2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43*bis*.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.
3. Additional observations, if necessary:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING

International application No.

PCT/EP2005/050037

Reference is made to the following documents:

- D1: FR-A-2 195 271 (RENAULT ET PEUGEOT,FR) 1 March 1974 (1974-03-01)
D2: US-A-4 510 962 (MOTT ET AL) 16 April 1985 (1985-04-16)
D3: US-A-5 800 131 (LEHMANN ET AL) 1 September 1998 (1998-09-01)

1. The present application does not meet the requirements of Article 33(2) PCT, since the subject-matter of independent claim 1 is not novel.

Prior art document D1 (see Fig.1) discloses a pumping system comprising: a pump and a user device (*not shown*) connected to said pump by a delivery conduit, and further comprising pressure control means 14, 16 for setting said pump to a balanced configuration to supply the oil flow demanded by said user device; wherein said pressure control means comprise hydraulic dissipating means 14 for imparting to the oil in a control chamber 13, forming part of said pump, a pressure P1 lower than a control pressure P; whereby the control chamber 13 of the pump comprises a channel connecting the control chamber 13 to an inlet 15.

Therefore, all the features of independent claim 1 are known from document D1.

2. Furthermore, document D2 taken independently of document D1 also discloses a pumping system with all the features of claim 1. Thus, this document also destroys the novelty of the subject-matter of claim 1.
3. The dependent claims 2 to 4 do not appear to contain any additional features which, in combination with the features of any claim to which they refer, could form subject-matter which is new and involves an inventive step (Art. 33(2) and Art. 33(3) PCT), the reasons being as follows:
 - 3.1 The additional features of dependent claims 2 and 3 are also known from prior art

document D1.

3.2 The additional features of dependent claim 4 are known from prior art document D3.

4. The industrial applicability of the claimed subject-matter is self-evident.

5. The attention of the applicant is also drawn to the following:

Contrary to the requirements of Rule 5.1 (a) ii) PCT, the documents D1 and D2 have not been acknowledged in the description.
